

I enjoy listening to K-Love in my car. it has helped me keep calm and humble in bad driving conditons. It is also teaching my daughter about God in a fun and positive way. If Klove is replaced by another program there will no longer be a great place for christian listeners to go. I do not listen to other stations because they are not appropriate for the whole family. They support ideas and behaviors that are not good for our community. People are strongly influenced by the music they listen to and Klove gives nothing but positie and encouraging messages. Klove is very important to everyone in our community because it provides a safe listening environment for everyone that listens. Just like their slogan-- Positive and encouraging!! Please keep K-Love Air 1 and 100.9 on the air. The american People need more stations like these. Maybe then we would be a much better country.
